Cover Letter

Hi! I'm Oli, a Graphic Designer from Western Australia currently freelancing in Leipzig, and specialising (at the moment) in Arts and Music promotion.

Having spent 4 years in training and over 2 years freelancing, I feel I have taught myself as much as I can on my own, so now I'm looking to immerse myself in collaborative and mutually inspiring work environments; to learn from those with more (or different) experience(s) than myself and to hone my craft further through practise and engagement with briefs and clients outside my comfort zone.

In return, I can offer you a committed work ethic, a vivid imagination, and a diverse range of skills from a fluency with the staid and traditional cornerstones of good graphic & type design like the Adobe & Affinity suites & Glyphs, to more the playful and dynamic environments of p5.js, touchdesigner, Blender, GANs, and more.

Thanks for your consideration, eagerly awaiting your reply.
